

ELECTRIC RATES**TRICO ELECTRIC COOPERATIVE, INC.****8600 W. Tangerine Road****Marana, Arizona 85653****Filed by: Marvin Athey****Title: CEO/General Manager**

Effective Date: September 1, 2005

STANDARD OFFER TARIFF**GENERAL SERVICE****SCHEDULE GS - 4****GENERAL SERVICE GREATER THAN 1,500 KW****Availability**

In the Cooperative's Certificated Area where its facilities are of adequate capacity and the required phase and suitable voltage are in existence and are adjacent to the premises served.

Application

The General Service Greater Than 1500 kW Rate (GS-4) is applicable for three-phase service for all of the electric service used for Commercial, Business, Professional and Industrial peak loads in excess of 1,500 kW which are supplied at one point of delivery and measured through one meter. Alternately, at the customer's option they may take delivery at multiple delivery points with one primary metering point provided that the customer pays the Cooperative a non-refundable contribution in aid of construction or, at the Cooperative's discretion, an advance in aid of construction for additional facilities required to serve multiple-delivery points. A monthly facilities charge may also be assessed based upon a cost analysis to serve the load. The Cooperative has the right to meter in the most practicable manner, either primary or secondary voltage. Service is available only if the Cooperative has adequate facilities to serve the customer or if adequate facilities can be built at the customer's expense to provide such service. Any peak load over 11,999 kW may be covered by this Tariff or, at the customer's request, pursuant to a separate written contract approved by the Cooperative and the Arizona Corporation Commission.

Type of Service

At available transmission or distribution voltages determined by the Cooperative. Where service of the type desired by the customer is not already available at the point of delivery, additional charges under the Cooperative's Line Extension Policy and special contract arrangements may be required prior to service being furnished.

Monthly Rate

(1)	<u>Customer Charge:</u>	
	Meter Cost	\$163.67 per month
	Meter Reading	\$ 11.33 per month
	Billing	\$126.17 per month
	Access	\$198.83 per month
	Total Customer Charge	\$500.00 per month

**GENERAL SERVICE
SCHEDULE GS - 4
GENERAL SERVICE GREATER THAN 1,500 KW**

- (2) Distribution Demand Charge at the Applicable Metering Point:
- | | |
|----------------------------------|-------------------------------------|
| Transmission Delivery | \$0.21 per kW of Billing Demand, or |
| Distribution Substation Delivery | \$1.75 per kW of Billing Demand, or |
| Distribution Primary Delivery | \$7.19 per kW of Billing Demand, or |
| Distribution Secondary Delivery | \$7.70 per kW of Billing Demand |

Definition of Service Levels

Transmission Delivery is defined as service taken at 69 kV or higher.

Substation Delivery is defined as service taken directly from the low side bus of the distribution substation or where customer has requested that multiple points of delivery be metered at the low side bus of the distribution substation. Where multiple delivery points are metered at the low side bus of the distribution substation, the customer will be charged an additional facilities charge for the Cooperative-owned, operated or maintained facilities on the customer side of the meter

Distribution Primary is defined as service taken at standard distribution voltages where the customer owns the final distribution transformation equipment or where the customer has requested that multiple points of delivery be metered at a single primary metering location. Where multiple delivery points are metered at a single primary metering location, the customer will be charged an additional facilities charge for the Cooperative-owned, operated or maintained facilities on the customer side of the meter.

Distribution Secondary is defined as service taken at standard secondary voltages where the Cooperative owns the final distribution transformation equipment.

- (3) Wholesale Power Cost:
The Wholesale Power Cost shall be the cost of electricity to serve the customer, including but not limited to, capacity, energy, transmission, ancillary services and fuel charges for the current billing period plus adjustments applied to the current monthly billing to account for differences in actual purchased electricity costs billed in previous periods from all providers who provide services in connection with the Wholesale Power Cost. The Wholesale Power Cost will be calculated using the billing units defined in the same manner as defined in the wholesale rate to the Cooperative, including any ratchet provisions in the wholesale rate. The customer's billing units may be adjusted for line losses, as determined by the Cooperative, to calculate the customer's power cost at the wholesale supplier's metering point to the Cooperative.
- (4) Facilities Charge:
An additional monthly charge for the provision of distribution facilities as determined by the written Agreement between the Cooperative and the customer.

Determination of Facilities Billing Demand

The billing Demand for purposes of determining the Distribution Demand Charge will be the greater of: (1) the contract demand as defined in the Agreement for Electric Service, (2) the highest maximum thirty-minute demand established during the current and previous eleven billing periods, or (3) 1,500 kW.

**GENERAL SERVICE
SCHEDULE GS - 4
GENERAL SERVICE GREATER THAN 1,500 KW**

Minimum Monthly Charge

The greater of the amount specified in the written Agreement between the Cooperative and the customer or the sum of the monthly Customer Charge, Distribution Demand Charge, and Facilities Charge.

Power Factor

The customer shall maintain power factor of not less than ninety percent (90%) but not greater than unity. The Cooperative shall have the right to measure such power factor at any time. Should such measurement establish that the power factor of the customer is less than ninety percent (90%) or greater than unity, the customer shall upon 60 days written notice correct such power factor to ninety percent (90%) to unity. If not timely corrected, the Cooperative shall have the right to increase the kWh for billing purposes by one percent (1%) for each one percent (1%) of power factor below ninety percent (90%) or above unity.

Tax Adjustment

To each of the charges computed in this Tariff, including all adjustments, shall be added the applicable proportionate part of any taxes or governmental impositions which are or may in the future be assessed on the basis of gross revenues and/or the price or revenue from the electric distribution, capacity and energy and transmission and ancillary services, sold and/or the volume of energy purchased for sale and/or sold hereunder.

Rules and Regulations

The Rules, Regulations and Line Extension Policies of the Cooperative as on file with the Arizona Corporation Commission shall apply to this rate schedule.

Upon application for service or upon request, the Cooperative will assist the customer in selecting the rate schedule best suited to the customer's requirements, but the Cooperative does not guarantee the customer will be served under the most favorable rate schedule. Upon written notification of any material changes in the customer's installation, load conditions, or use of service, the Cooperative will assist in determining if a change in rate schedule is desirable. No more than one (1) such change at the customer's request will be made within any twelve (12) month period.

Contract

All electric service provided pursuant to this Tariff shall be set forth in a written agreement between the Cooperative and the customer. Any service provisions that are different from the provisions of the Tariff shall be set forth in a written agreement that will require the approval of the Arizona Corporation Commission. The written agreement shall contain, among other provisions, provisions for a Contract Demand, Minimum Monthly Charge and a Facilities Charge to cover capital costs and operation and maintenance costs, if applicable. Should the customer request service at the Transmission Delivery rate, and should the line connections be made directly with the lines of the Cooperative's transmission provider, then the contract may become a three-party contract to cover the provisions required by the Cooperative's transmission provider.

Service Availability Charge

A Service Availability Charge to be paid by the customer to the Cooperative may be included in the contract to reimburse the Cooperative for its operating expenses with regard to idle or standby services in connection with the facilities constructed or installed pursuant to the contract based upon the Cooperative's estimate of its actual operating costs for such idle or standby services.

**GENERAL SERVICE
SCHEDULE GS - 4
GENERAL SERVICE GREATER THAN 1,500 KW**

Environmental Portfolio Standard (EPS) Charge

The Cooperative shall add to its bill an EPS charge in accordance with the approved EPS tariff to help offset the costs associated with TRICO programs designed to promote alternative generation requirements that satisfy the Environmental Portfolio Standard as approved by the Arizona Corporation Commission. Other charges may be applicable subject to approval by the Arizona Corporation Commission.

Demand Side Management (DSM) Programs; DSM Adjustment Mechanism

The Cooperative shall recover its cost for pre-approved DSM programs through a separate DSM adjustment mechanism which shall provide for a separate and specific accounting for pre-approved DSM costs.
